

3.1 Solving Problems by Estimating Page 1 pg. 69

Student Book pages 68–69

1-5

GOAL

Estimate sums of 2-digit numbers to solve problems.

Problem

Lang wrote a story.

His story has 3 pages.

- Page 1 has 21 words.
- Page 2 has 43 words.
- Page 3 has 45 words.

You will need

- base ten blocks

- a place value chart

Thousands	Hundreds	Tens	Ones

Did Lang write more than 100 words?

Use base ten blocks to show the number of words on each page.

Hundreds	Tens	Ones

$$100 + 9$$

Step 1: Count the tens.

How many tens are there?

10 tens is 100

$$\begin{array}{r} 20 \\ + 40 \\ + 40 \\ \hline 100 \end{array}$$

Front end

100 is between 100 and 110
estimate
 $100 + 10$

3.1 Solving Problems by Estimating Page 2

Step 2: Does Lang need to count the ones to know if he has more than 100 words? No - just needs an estimate

How do you know?

I can see that there is more than 100 words when I added the tens

Did Lang write more than 100 words? yes

Reflecting

Jodi's story is 2 pages long.

Page 1 has 42 words.

Page 2 has 65 words.

$$\begin{array}{r} 40 \\ + 60 \\ \hline 100 \end{array} \quad \text{over } \underline{\underline{100}}$$

check

$$\begin{array}{r} +1 \\ 42 \\ + 65 \\ \hline 107 \end{array} \quad \checkmark$$

How can Jodi find out if she wrote more than 100 words?

She can use a number line or base 10 blocks. Add the tens to see if 100 or more.

	Tens	Ones
Page 1		..
Page 2	

$$100 \text{ words} + 7 = 107$$

$$40 + 70 = 110$$

3.1 Solving Problems by Estimating Page 1

Student Book pages 68–69

GOAL

Estimate sums of 3-digit numbers to solve problems.

You will need

- base ten blocks

- a place value chart

Checking

1. Maya wrote a story.

The first page had 275 words.

The second page had 250 words.

Does her story have more than 500 words?

Step 1: Circle the kind of answer you need: exact estimate

How do you know?

I know because she needs 500 words not exact - could be over too.

Step 2: Model 275 and 250 with base ten blocks.

Draw your models in the place value chart.

Number	Hundreds	Tens	Ones
275			
250			
+			

I see 400 and more than 10-tens.

Did Maya write more than 500 words? yes

How do you know?

When I add 275 plus 250 I get 525 which is more than 500.

3.1 Solving Problems by Estimating Page 2

Practising

4. Your school has \$800 to spend on a computer and a printer.

The computer costs \$575.

The printer costs \$275.

Does your school have enough money?

Step 1: Circle the kind of answer you need: exact estimate

Step 2: Estimate $575 + 275$.

Model the numbers using base ten blocks.

Draw your models.

Number	Hundreds	Tens	Ones
575			
275			

8
5
0

Does your school have enough money? no

How do you know?

We are \$50 over - oh no!!

Chapter 3 Lesson 1

Name: _____ Date: _____

Solving Problems by Estimating

GOAL

Estimate sums of 3-digit numbers to solve problems.

1. Use mental math to calculate the first sum.
Use that sum to estimate the next sum.

- a) $300 + 100 = 400$, so $298 + 105 =$ about 400
 b) $200 + 300 = 500$, so $202 + 298 =$ about 500 ✓
 c) $100 + 50 = 150$, so $96 + 53 =$ about 150 ✓
 d) $150 + 300 = 450$, so $161 + 288 =$ about 450 ✓

check

$$\begin{array}{r} 298 \\ + 105 \\ \hline 403 \end{array}$$

b)
$$\begin{array}{r} 202 \\ + 298 \\ \hline 500 \end{array}$$

c)
$$\begin{array}{r} 96 \\ + 53 \\ \hline 149 \end{array}$$

d)
$$\begin{array}{r} 161 \\ + 288 \\ \hline 449 \end{array}$$

2. Estimate each sum. Show your work.

- a) $249 + 199$ is about $250 + 200 = 450$ $200 + 200 = 400$
 b) $96 + 402$ is about $100 + 400 = 500$
 c) $353 + 47$ is about $350 + 50 = 400$
 d) $208 + 297$ is about $200 + 300 = 500$

3. Cole's father saved \$600 for furniture. He wants to buy a rug for \$277 and a lamp for \$303. Does he have enough money? Show your work.

$300 + 300 = 600$ ✓

Yes because he estimated higher than he needed to.

check

$$\begin{array}{r} 277 \\ + 303 \\ \hline 580 \end{array}$$

4. Kate made 200 brownies. She needs 145 brownies for a bake sale, and she needs 48 brownies for her class at school. Did she make enough brownies?

$150 + 50 = 200$ ✓

Yes because she estimated high

check

$$\begin{array}{r} 145 \\ + 48 \\ \hline 193 \end{array}$$

Adding Mentally

Answer

Goal Use mental math strategies to add 2-digit numbers.

1. Move counters to make the addition easier.

Then write the answer.

2. Use mental addition.

- a) $20 + 30 = 50$
- b) $50 + 20 = 70$
- c) $19 + 31 = 20 + 30 = 50$
- d) $18 + 32 = 20 + 30 = 50$
- e) $49 + 21 = 50 + 20 = 70$

At-Home Help

Moving counters from one group to another can sometimes make adding easier.

3. Use mental math to solve these problems.

- a) There are 38 students in Mrs. Jones's classroom and 23 students in Mr. Singh's classroom. How many students are there altogether? $40 + 20 = 60 + 1 = 61$
- b) Payden has 48 cents and Jill has 22 cents. How much money do they have altogether? $50 + 20 = 70$
- c) Avis is 19. Her grandmother is 58 years older. How old is Avis's grandmother? $20 + 60 = 80 - 3 = 77$
- d) There are 37 cans on one shelf and 43 on another. How many cans are there altogether? $40 + 40 = 80$
- e) There are 28 large paper clips and 38 small paper clips. How many paper clips are there altogether? $30 + 40 = 70 - 4 = 66$

Rounding Numbers

Name _____

Round **473** to the nearest 10.

0 1 2 3 4 5 6 7 8 9
 ← round down round up →

Think: the closest multiples of 10 are 470 and 480.

473 is closer to 470.

473 rounded to the nearest 10 is 470.

Use the number lines to complete the sentences.

Round **6350** to the nearest 100.

1.

When a number is halfway between 2 multiples, round up.

Think: the closest multiples of 100 are 6300 and 6400.

6350 is halfway between 6300 and 6400.

6350 rounded to the nearest 100 is 6400.

Round **87 692** to the nearest 1000.

2.

Think: the closest multiples of 1000 are 87 000 and 88 000.

87 692 is closer to 88 000.

87 692 rounded to the nearest 1000 is 88 000.

Round the numbers. Use the number lines above if you wish.

3. 497 to the nearest 10 500

4. 6420 to the nearest 100 6400

5. 6180 to the nearest 100 6200

6. 89500 to the nearest 1000 90 000

Multiples of 10, 100, and 1000

Name _____

Count by 10. Write the multiples of 10 between 20 and 130.

A multiple of 10 is a number whose last digit is 0.

30, 40, 50, 60, 70, 80, 90, 100, 110, 120

Complete.

1. Count by 100. Write the multiples of 100 between 600 and 1500.

A multiple of 100 is a number whose last 2 digits are 0.

700, 800, 900, 1000, 1100, 1200, 1300, 1400

2. Count by 1000. Write the multiples of 1000 between 53 000 and 59 000.

A multiple of 1000 is a number whose last 3 digits are 0.

54 000, 55 000, 56 000, 57 000, 58 000

Use the number lines to complete the sentences.

3.

The multiples of 10 on the number line are 80 and 90.

The multiple of 10 closer to 89 is 90.

4.

The multiples of 100 on the number line are 400 and 500.

The multiple of 100 closer to 423 is 400.

5.

The multiples of 1000 on the number line are 3000 and 4000.

The multiple of 1000 closer to 3878 is 4000.

3.2 Estimating Sums Page 1

Student Book pages 70–72

GOAL

Estimate sums in different ways.

Problem

Aneela plans to run the route shown at the right.

 About how far will Aneela run?

Use two ways to estimate.

Estimate by adding the hundreds:

Write the numbers in the place value chart.

The first one is done for you.

Number	Hundreds	Tens	Ones
210	2	1	0
320	3	2	0

Front end + 200
+ 300
500

Circle the hundreds.

Add the circled hundreds.

$$200 + 300 = 500$$

Aneela will run about 500 m.

I can make a
range
between 500–700

$$200 + 300 = 500 -$$

$$300 + 400 = 700$$

3.2 Estimating Sums Page 2

Estimate using a number line

Step 1: Find 210 on the number line.

200 is the closer hundred. ✓

Step 2: 310 is close to 300.

$$200 + 300 = 500$$

Start at 200 and jump 300 m.

Aneela will run about 500 m.

Reflecting

How would you estimate $280 + 190$?

$$300 + 200 = 500 \quad 280 + 190 = 470$$

We can round both to the closest hundred spot then add.

$$280 + 190 = 470$$

$$300 + 200 = 500$$

What other ways can you use to estimate sums?

① We can round using front end method

$$\begin{array}{r} 200 \\ + 100 \\ \hline 300 \end{array}$$

② We can also round (280) to the tens (190)

$$\begin{array}{r} 280 \\ + 190 \\ \hline 470 \end{array}$$

3.2 Estimating Sums Page 2

Practising

2. Estimate.

a) $567 + 513$

Add the closer hundreds using the number line.

Record all your jumps.

$567 + 513$ is about 1067 ✓

$500 + 500 = 1000$
between
 $1000 - 1100$

4. The chart shows the number of people who went to a 3-day folk festival.

Estimate the total attendance.

Day	Attendance
Thursday	899
Friday	1799
Saturday	2375

$$\begin{array}{r} 900 \\ 2000 \\ 2000 \\ \hline 4900 \end{array}$$

4900

Circle the closer hundreds.

800 899 900

1700 ~~1799~~ 1800

2300 2375 2400

Add the circled numbers.

$900 + 1800 + 2400 = 5100$

About how many people attended the festival? 5000

3.2 Estimating Sums Page 1

Student Book pages 70–72

GOAL

Estimate sums in different ways.

Checking

1. Kate plans to run the route shown at the right.

Estimate how far she will run by adding the thousands.

Write the numbers in the place value chart.

The first one is done for you.

Number	Thousands	Hundreds	Tens	Ones
400	0 + 1	+ 1 4	0	0
1290	1 + 1	2	9	0
450		4	5	0
1200	1	2	0	0

Circle the thousands.

Add the circled thousands.

$$1000 + 1000 = 2000$$

actual 3340.

Kate will run about 2000 m.

Explain one other way you could estimate how far Kate will run.

I could add the hundreds
with the 1000's

$$\begin{array}{r}
 400 \\
 200 \\
 2000 + 1200 = 3200 + 400 \\
 2000 + 1000 = 3000 + 200 \\
 \hline
 3200
 \end{array}$$

Chapter 3
Lesson 2

Name: _____ Date: _____

answer key
Estimating Sums

GOAL

Estimate sums in different ways.

1. Estimate each sum. Show your work.

a) $210 + 499$ is about

$200 + 500 = 700$ OR $210 + 500 = 710$

b) $589 + 308$ is about 908

$600 + 308 = 908$ OR $600 + 300 = 900$

c) $1072 + 994$ is about

$1000 + 1000 = 2000$

d) $3987 + 2001$ is about

$4000 + 2000 = 6000$

At-Home Help

Here are some ways to estimate sums.

- Use base ten blocks or counters to model the problem.
- Use a number line to model the problem.
- Estimate by adding the closer hundreds or thousands (e.g., 1130 is closer to 1000 than 2000).

2. Estimate each sum. Show your work.

a) $510 + 203 + 696$ is about $500 + 200 + 700 = 1400$

b) $1080 + 5098 + 2900$ is about $1000 + 5000 + 3000 = 9000$

c) $929 + 1100 + 997$ is about $9000 + 1000 + 1000 = 3000$

d) $2033 + 1002 + 1977$ is about $2000 + 1000 + 2000 = 5000$

e) $3172 + 3030 + 2960$ is about $3000 + 3000 + 3000 = 9000$

f) $1072 + 2908 + 3978$ is about $1000 + 3000 + 4000 = 8000$

3. Jade wants to collect 8000 pennies, or \$80. She has a jar with 1048 pennies, a jar with 2083 pennies, and a jar with 3992 pennies. Does Jade have enough pennies? How do you know?

$1000 + 2000 + 4000 = 7000$

NO because she only has 8000.

Estimating Sums

Goal Estimate sums by rounding.

1. Estimate. Show your rounded numbers.

a) $1867 + 913$ is about equal to

$$2000 + 1000 = 3000$$

b) $3611 + 1489$ is about equal to

$$4000 + 1500 = 5500$$

c) $1156 + 2722$ is about equal to

$$1000 + 3000 = 4000$$

d) $999 + 1999$ is about equal to

$$1000 + 2000 = 3000$$

2. Estimate the answers to these problems. Show your rounded numbers.

a) Jack's mother drove 1245 km on Saturday and 985 km on Sunday.
About how many kilometres did she drive on those 2 days?

$$1000 + 1000 = 2000$$

b) 4856 people live in one town. 3345 live in another town.
About how many people live in the 2 towns?

$$5000 + 3000 = 8000$$

about 8000
people live
in both
towns.

3. Use rounded numbers to find whether \$5000 is enough to buy both items in each part. Check your answers using a calculator.

a)

\$1648

\$4567

No, not enough

b)

\$1219

\$2511

$$1500 + 4500 = 6000$$

$$6000 > 5000.$$

$$1200 + 2500 = 3700$$

Yes, enough because

$$5000 > 3700.$$

At-Home Help

You can use **rounded numbers** to **estimate a sum** (the answer when you add).

$$3859 + 1321$$

close to 4000

close to 1000

The sum is about
 $4000 + 1000 = 5000.$

Try These

1. Circle the best estimate. Explain how you estimated.

a) $20 + 30$
 $21 + 33$ possible estimates
 50 60 70

$20 + 30 = 50$

b) $48 + 46$ 80 90 100

$50 + 50 = 100$

c) $37 + 25$ 50 60 70

$40 + 30 = 70$

2. Estimate each sum.
 Show the numbers you used to estimate.

a) $32 + 41$ is about 70.

$30 + 40 = 70$

b) $17 + 58$ is about 80.

$20 + 60 = 80$

c) $29 + 36$ is about 70.

$30 + 40 = 70$

3. Arya uses a 100 chart to add $27 + 28$.

He adds 28 in parts by adding 20 and then adding 8.

To add 20, go down 2 rows.

To add 8, go forwards 8 or

go down 1 row (that's + 10)

and then back 2 (that's - 2).

Use the 100 chart to add.

Use a different colour for each addition.

a) $22 + 11 = 32$

c) $24 + 69 = 94$

b) $63 + 33 = 96$

d) $78 + 17 = 95$

$63 + 30 = 93$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

4. What is the total cost?

a)

$$16 + 23 = \boxed{39}$$

$$\begin{array}{r} 20 + 20 = 40 \\ 16 + 20 = 36 \\ 20 + 23 = 43 \end{array}$$

b)

$$26 + 65 = \boxed{91}$$

$$\begin{array}{r} 30 + 70 = 100 \\ 30 + 65 = 95 \\ 26 + 70 = 96 \end{array}$$

c)

$$37 + 28 = \boxed{65}$$

$$\begin{array}{r} 40 + 30 = 70 \\ 37 + 30 = 67 \\ 40 + 28 = 68 \end{array}$$

5. Show 2 ways to complete each addition.

a) $48 + 7$

$$50 + 7 = 57$$

$$48 + 10 = 58$$

$$50 + 10 = 60$$

b) $67 + 24$

$$70 + 24 = 94$$

$$67 + 20 = 87$$

$$70 + 20 = 90$$

3.4 Adding from Left to Right Page 1

Student Book pages 74–76

GOAL

Solve addition problems by adding from left to right.

Problem

A forklift operator wants to lift 3 containers.

The forklift can safely lift up to 400 kg.

Can the forklift safely lift all 3 containers?

Use base ten blocks.

Step 1: Model each number with base ten blocks.

Draw your models.

You will need

- base ten blocks

- a place value chart

Thousands	Hundreds	Tens	Ones

Hundreds	Tens	Ones	
			212
			123
			54

$$300 + 80 + 9 = 389$$

3.4 Adding from Left to Right Page 2

Step 2: Add the hundreds.

$$200 + 100 + 0 = 300$$

Step 3: Add the tens.

$$10 + 20 + 50 = 80$$

Step 4: Add the ones.

$$2 + 3 + 4 = 9$$

Step 5: Add the hundreds, tens, and ones.

$$300 + 80 + 9 = 389$$

Can the forklift safely lift all 3 containers? yes

How do you know?

Because $389 < 400$

$$\begin{array}{r}
 \textcircled{2} \boxed{1} 2 \\
 \textcircled{1} \boxed{2} 3 \\
 + \textcircled{0} \boxed{5} 4 \\
 \hline
 300 \\
 80 \\
 + 9 \\
 \hline
 389
 \end{array}$$

Reflecting

How could you have predicted whether the forklift could safely lift all 3 containers?

We could use 300
front end + 80
estimation 380
and not added the ones

3.4 Adding from Left to Right Page 1

Student Book pages 74–76

GOAL

Solve addition problems by adding from left to right.

Checking

1. A forklift can lift 8000 kg safely.

The operator needs to lift 3 containers.

- Container 1 has a mass of 2455 kg.
- Container 2 has a mass of 849 kg.
- Container 3 has a mass of 4567 kg.

Can the 3 containers be lifted safely?

Step 1: Write the masses in the place value chart.

This Step has been done for you.

Mass		Thousands	Hundreds	Tens	Ones
2455		2	4	5	5
849		0	8	4	9
4567	+	4	5	6	7
		6	0	0	0
		1	7	0	0
			1	5	0
	+			2	1
		7	8	7	1

Step 2: Add from left to right. Write the totals in the table.

The thousands have been done for you.

7871 < 8000

3.4 Adding from Left to Right Page 2

a) Can the forklift lift all 3 containers? yes

How do you know?

When we added an exact amount it was 7871 Kg which is less than 8000.

b) Did you estimate to solve the problem or did you calculate an exact answer?

Yes, but our estimate was too high using front end rounding.

Explain.

When we added the exact it was more accurate

Practising

6. Add from left to right.

a)

	1	2	5	9
+	0	6	1	8
	1	0	0	0
		8	0	0

	5	8	1	4

c)

	6	2	2	4
+	1	7	6	8
	7	0	0	0
		9	0	0
			8	0
+			1	2
	7	9	9	2

f)

	1	1	4	3
+		2	5	1
		4	0	2
	1	0	0	0
		7	0	0
			9	0
+				6
	1	7	9	6

At-Home Help

Follow these steps to add from left to right.

Step 1 Add the thousands.

Step 2 Add the hundreds.

Step 3 Add the tens.

Step 4 Add the ones.

Step 5 Add them all together to calculate the sum.

For example:

1	2	4	6	
+	2	9	3	4
<hr/>				
3	0	0	0	(thousands)
1	1	0	0	(hundreds)
	7	0		(tens)
+	1	0		(ones)
<hr/>				
4	1	8	0	

Scaffolding for Lesson 4, Questions 3 & 6

Page 2

STUDENT BOOK PAGE 76

6. Calculate. Show your work.
Some of the steps are done for you.

a)

	1	2	5	9	
+		6	1	8	
	1	0	0	0	
		8	0	0	
			6	0	
+			1	7	
	1	8	7	7	

c)

	4	2	1	1	
		3	4	5	
+		9	6	7	
	4	0	0	0	
	1	4	0	0	
		1	1	0	
+			1	3	
	5	5	2	3	

b)

	6	9	6	3	
+	2	3	6	4	
	8	0	0	0	
	1	2	0	0	
		1	2	0	
+				7	
	9	3	2	7	

d)

	1	5	6	7	
	1	5	7	8	
+	2	5	6	7	
	4	0	0	0	
	1	5	0	0	
		1	9	0	
+		1	2	2	
	5	7	1	2	

3.5 Adding From Right to Left Page 1

Student Book pages 78–80

GOAL

Solve addition problems by adding from right to left.

Problem

Aneela's school collects food labels to get points. They can trade the points for school equipment.

You will need

- base ten blocks

- a place value chart

Thousands	Hundreds	Tens	Ones

How many points does Aneela's school need for the whistle and baseball?

Use base ten blocks.

Step 1: Model the numbers with base ten blocks.

Hundreds	Tens	Ones

Step 2: Add the ones.

$$\underline{5} + \underline{5} = \underline{10}$$

3.5 Adding From Right to Left Page 2

Step 3: Regroup the ones. Add a ten.

regroup

Trade 10 smaller units for 1 larger unit, or 1 larger unit for 10 smaller units

Step 4: Add the tens.

$$80 + 70 + 10 = 160$$

Step 5: Regroup the tens. Add a hundred.

Step 6: Add the blocks.

$$100 + 60 + 0 = 160$$

Aneela's school needs 160 points.

Reflecting

How do you know when to regroup when you are adding from right to left?

Ones → We regrouped when there was more than 10.

Tens → We regrouped when there was more than ten-tens

Rounding Numbers

Name _____

Round 473 to the nearest 10.

Think: the closest multiples of 10 are 470 and 480.

473 is closer to 470.

473 rounded to the nearest 10 is 470.

Use the number lines to complete the sentences.

Round 6350 to the nearest 100.

1.

When a number is halfway between 2 multiples, round up.

Think: the closest multiples of 100 are 6300 and 6400

6350 is halfway between 6300 and 6400.

6350 rounded to the nearest 100 is 6400.

← round down
0 1 2 3 4
5 6 7 8 9 → round up

Round 87 692 to the nearest 1000.

2.

Think: the closest multiples of 1000 are 87 000 and 88 000

87 692 is closer to 88 000.

87 692 rounded to the nearest 1000 is 88 000.

Round the numbers. Use the number lines above if you wish.

3. 497 to the nearest 10 500

5. 6180 to the nearest 100 6200

4. 6420 to the nearest 100 6400

6. 89 500 to the nearest 1000 90 000

Multiples of 10, 100, and 1000

Name _____

Count by 10. Write the multiples of 10 between 20 and 130.

A multiple of 10 is a number whose last digit is 0.

20, 30, 40, 50, 60, 70, 80, 90, 100, 110, 120, 130, 140, 150

Complete.

- Count by 100. Write the multiples of 100 between 600 and 1500.

A multiple of 100 is a number whose last 2 digits are 0.

700, 800, 900, 1000, 1100, 1200, 1300, 1400, 1500

- Count by 1000. Write the multiples of 1000 between 53 000 and 59 000.

A multiple of 1000 is a number whose last 3 digits are 0.

54 000, 55 000, 56 000, 57 000, 58 000, 59 000

Use the number lines to complete the sentences.

3.

The multiples of 10 on the number line are 80 and 90.

The multiple of 10 closer to 89 is 90.

4.

The multiples of 100 on the number line are 400 and 500.

The multiple of 100 closer to 423 is 400.

5.

The multiples of 1000 on the number line are 3000 and 4000.

The multiple of 1000 closer to 3878 is 4000.

Chapter 3 Lesson 5

Adding from Right to Left

GOAL

Solve addition problems by adding from right to left.

1. Add from right to left. Show your work.

a)

	1	2	2	5
+		4	3	1
	1	6	5	6

c)

	4	0	7	2
+	3	7	2	4
	7	7	9	6

b)

	1	7	6	0
+	1	2	4	8
	3	0	0	8

d)

	8	6	4	3
+		6	4	8
	9	2	9	1

2. Jade's mother saved \$3966 this year. Next year, she plans to save \$2992. Will she have enough money to buy a car that costs

\$7000?

she is short
No

$$\begin{array}{r} +1 \quad +1 \\ 3966 \\ + 2992 \\ \hline \$6958 \end{array}$$

3. In September, Joshua's website had 227 visits. In October, it had 2143 visits. In November, it had 2324 visits. Has the number of visitors reached 5000?

$$\begin{array}{r} +1 \\ 227 \\ 2143 \\ + 2324 \\ \hline 4694 \end{array}$$

no only 4694.

At-Home Help

You can **regroup** by trading 10 smaller units for 1 larger unit, or 1 larger unit for 10 smaller units. Follow these steps to add from right to left.

Step 1 Add the ones. If the answer is 10 or more, regroup.

Step 2 Add the tens. If the answer is 100 or more, regroup.

Step 3 Add the hundreds. If the answer is 1000 or more, regroup.

Step 4 Add the thousands. For example:

$$\begin{array}{r} 11 \\ 3762 \\ + 1942 \\ \hline 5704 \end{array}$$

Adding 4-Digit Numbers

answer Key!

Goal Solve addition problems using regrouping.

1. Complete the addition by writing in the spaces in the place value chart.

a)

Thousands	Hundreds	Tens	Ones
+1	+1	+1	
2	7	3	2
2	8	6	9
5	6	0	1

b)

Thousands	Hundreds	Tens	Ones
+1		+1	
2	7	3	8
6	4	3	9
9	1	7	7

At-Home Help

You can add two 4-digit numbers by **regrouping**.

$$2539 + 1866$$

Thousands	Hundreds	Tens	Ones
1	1	1	
2	5	3	9
1	8	6	6
4	4	0	5

$$\begin{array}{r} 111 \\ 2539 \\ + 1866 \\ \hline 4405 \end{array}$$

The answer seems reasonable because $3000 + 2000 = 5000$ and the answer is close to 5000.

2. Estimate the sum. Then add.

a) $\begin{array}{r} 3988 \\ + 2246 \\ \hline 6234 \end{array}$ $\begin{array}{r} 4000 \\ + 2000 \\ \hline 6000 \end{array}$ b) $\begin{array}{r} 3254 \\ + 862 \\ \hline 4116 \end{array}$ $\begin{array}{r} 3000 \\ + 900 \\ \hline 3900 \end{array}$ c) $\begin{array}{r} 4310 \\ + 3859 \\ \hline 8169 \end{array}$ $\begin{array}{r} 4000 \\ + 4000 \\ \hline 8000 \end{array}$

3. Estimate. Then solve.

- a) There are 3456 Girl Guides in one area and 1672 in another area. What is the total number of Girl Guides in both areas?

5128 at both ~~tables~~ areas

3000 + 2000 = 5000

$$\begin{array}{r} 3456 \\ + 1672 \\ \hline 5128 \end{array}$$

- b) There are 1867 Wolf Cubs in one area and 4306 in another area. What is the total number of Wolf Cubs in both areas?

2000 + 4000 = 6000

$$\begin{array}{r} 1867 \\ + 4306 \\ \hline 6173 \end{array}$$

6173 at both Wolf Cubs.
